Salt Lake City, Utah (May 14, 2009) - The Women Tech Council (WTC), a non-profit organization that provides leadership, support and mentorship for women in all levels of the technology industry, announces the final week for nominations for the annual Women Tech Awards.

The Women Tech Awards, presented by the WTC, recognize technology-focused women who are driving innovation, influencing technology companies and are passionate about the community. Nominees will be judged according to her professional accomplishments, personal achievements and leadership in business and the community. Women may be nominated for strengths in/as:

- Technology leadership
- Entrepreneurial leadership
- Technology professional leadership
- Community leadership
- Emerging leader
- Product innovator
- Rising star
- Technology visionary

“Today’s women are the rising stars in driving advancements in technology,” said Cydni Tetro, Chief Marketing Officer at NextPage and director of WTC. “Through the Women Tech Awards, we are honoring those women in the community who are breaking new barriers. We invite everyone to submit a nomination for their colleagues, peers, family members and friends who are clear technology visionaries and give them a chance to receive the recognition they deserve.”

Nominations will be open for submission until May 31, 2009. Finalists and recipients will be honored at a luncheon hosted by Mountain West Capital Network on September 18, 2009. For more information, please visit <http://www.womentechcouncil.org/women-tech-awards>.

About Women Tech Council

Founded in 2007, Women Tech Council was designed to be an advocate for women who are currently working for technology companies and for those that may work for

businesses in other market sectors working with technology in their job roles. WTC provides leadership, resources and mentoring for women while maintaining a strong bond with the business community supporting avenues for top technology talent and visible sponsorship opportunities. WTC supports women-owned and women-operated technology companies. WTC provides value to the business community by recognizing women leaders and entrepreneurs in the technology business and supporting them.
